

## DATASHEET

# 2860MI-SC/SB

Approval Certificate: 26.149

Safety footwear for professional use, elastic boot type, made in soft full grain leather in black color with steel toe cap (200 Joules). Polyurethane overcap protector (PU). Inner metatarsal protector and metatarsal cover made of thermoplastic polyurethane (TPU) with Full Flex system. Leather with specific treatment for safety shoes, providing greater comfort and durability. Closure in double-weave elastic side covered in leather, fully lined upper with SafetDry non-woven. Single, double and quadruple backstitch made with high tenacity nylon threads. Heel-lined leather for comfort and durability. Non-woven mounting insole sewn into the Strobel system. The hygienic insoles are antibacterial and removable.

Rudolf soles PU dual density (two layers of polyurethane), directly injected into the upper. Its midsole is softer and lighter, providing greater comfort and shock absorption. The sole is sturdier, compact and has claws for greater grip on the ground. It has the exclusive technology full impact, anti-torsion bar, adherent ducts, correct folder and flex point system that facilitates the feet flexion.

Shock absorption

Steel toe cap (200 J)
