

DATASHEET

4887/EL

Approval Certificate.: 32.496

Safety footwear for professional use, shoe with shoelaces, made in soft full grain leather in black color with composite toe cap (200 Joules). Footwear tested at 14,000 volts and approved for electrician use. Leather with specific treatment for safety shoes, providing greater comfort and durability. Rounded black shoelaces with details in graphite, polyester, with resinated tips. Plastic eyelets, anti-impact padded engineering foam in the collar, whole vamp that provides more comfort, fully lined upper with SafetDry non-woven. Single and double backstitch made with high tenacity nylon threads. Heel-lined leather for comfort and durability. Non-woven mounting insole sewn into the Strobel system. The hygienic insoles are antibacterial and removable.

Falcon soles PU dual density (two layers of polyurethane), directly injected into the upper. Its midsole is softer and lighter, providing greater comfort and shock absorption. The sole is sturdier, compact and has claws for greater grip on the ground. It has the exclusive technology full impact, anti-torsion bar, adherent ducts, correct folder and flex point system that facilitates the feet flexion.

Shock absorption

Composite toe cap (200 J)
